

[MALANADU]

Date: 01-02-2020

Guide: Rony Tom

1. Project Overview?

The website Malanadu is designed to increase the sales of products manufactured at Malanadu Development Society. The list of products include bakery items, milk products, beverages etc.

In the current system, the products are sold in nearby shops and the customers need to visit the shop to purchase the products. So in this way, unavailability of products in the shops are the main problem.

So, if we customize it and perform the selling and purchasing in online will increase the business. The customers can search the products and they can see the products details from the website. If the customers can interested to purchase a product they can buy the products very easily.

2. To what extend the system is proposed for?

Bill Payment, Feedback, Raw material collection, Employee registration

3. Specify the Viewers/Public which is to be involved in the System?

The person who like the products at the malanadu development society
